FIRECLAY SINKS

THE UNIVERSAL FEATURES OF FIRECLAY

This eco-friendly sink option uses sustainable material and can return to the earth at the end of your sink's usage. Fireclay sinks can handle high temperatures, are naturally resistant to bacteria, and can absorb sound. The porcelain enamel glazed surface on these hand finished artisan sinks also resists staining.

Watch for these icons for each sink. The overall sink base measurement will appear with product. Most will require custom cabinets and pro installation with a FARMSINK BASE. Sinks may have a traditional thick wall, or a contemporary thin one, and may also be dual mount or under-mount only. Lastly, FIRECLAY sinks are heavy, you'll need 2 people to lift.

Our *Vineyard Collection* takes its name from Martha's Vineyard – just across the waters from the quaint island of Nantucket. With unique and distressed colored finishes and decorative details reminiscent of New England's islands, this collection is reflective of these artist colonies. These fireclay sinks encompass the delightful variations of oceanic hues, sandy beaches and rolling farmlands. These beautiful fixtures will mesmerize you with their charms - like the famed summer gingerbread cottages with all their intricacies.

BEFORE YOU BUY: Understand that you will be investing in a unique piece of art. Every sink is hand finished by Italian craftsmen. As a result, no two sinks are exactly alike.
